Eurailscout already realized CO2 reduction goal of 2020!

20 May 2015

In 2010 Eurailscout set the goal to realize a reduction of CO2 emissions of 20% in 2020.

The results of 2014 show that this goal has already been realized. More video conference meetings, public transport, cleaner cars and the use of renewable energy sources contributed to this fantastic result. Eurailscout will remain focused on the reduction of CO2 emissions in the years to come.

Eurailscout and CO2 reduction: Clearly on the right path!
