## Conformity with the European standards

17 March 2016

It is important for Eurailscout to comply with the international regulations in the fields of safety, quality and environment.

From March 2016 Eurailscout will be certified as one of the first companies in the Netherlands based on the latest versions (2015) of the following European standards:

- ISO 9001 – Quality
- ISO 14001 – Environment
- OHSAS 18001 – Safety

The certification is valid until 2019 and we are proud of it. With these standards Eurailscout meets the requirements of customers from the Netherlands and Europe.
