## Manual ultrasonic measurement in Belgium

03 April 2019

Two of our qualified ultrasonic experts went to Belgium for a manual ultrasonic measurement. The track is cast in concrete and located next to the water in Puurs, close to the port of Antwerp.

Our experts had to clean the track first because there was a lot of mud on the track. It was a difficult environment but the measurements went very well.

EURAILSCOUT is happy to help European partners in manual NDT measurements.
